

Thomson® Wins First Place in Control Design's Readers' Choice Awards 2015

Thomson is recognized as Control Design magazine's Readers' Choice for technological excellence in the Linear Motion Actuator/Slide/Guide category.

Control Design sent the questionnaire to 17,974 of its magazine subscribers, who were asked to provide the name of the company they recognize as having the best service and support in each respective category. Thomson was ranked first, reflecting the quality of Thomson offering.

NEW: Thomson Tech Tips Video

IP Ratings Explained.

The International Protection code (IP ratings), classifies the different levels of protection for electrical equipment, like electric linear actuators.

The first rating is for the protection against solid foreign objects and the second rating is for the protection of ingress of liquids like water. Knowing what the ratings mean allow you to know how much protection your actuator will have in your next design.
